

## Clinical Records Research Live Demo and Interactive Session

### What is the CRIS?

The CRIS (Clinical Record Interactive Search) is a technology platform that provides access to patient records held by us and other participating Trusts for research and clinical audit. All data is **completely anonymous** and **carefully vetted** by authorised users before researchers can access it.

- The Trust has recently implemented the CRIS and we now need a variety of perspectives on how it is used.
- The CRIS is a powerful tool and requires monitoring by a Committee which has space for 2 service users or carer representatives.

---

### Want to find out more?

Why not come along to a live demonstration and Q&A session on:

**Thursday 29th June 10.30 – 12.30**  
**Conference room C, Springfield Hospital**

---

The event is free and refreshments will be provided.

We look forward to seeing you there!
