

Recovery College

How to navigate our courses:

We recommend that every new student begins their journey with us by attending two intro level courses that will provide a foundation of knowledge for all our courses, no matter what your area of interest is. These are:

- **Introduction to Recovery**
- **Five Ways to Wellbeing**
- **Taking Back Control 1 – Building Resilience**

Once you have completed these, depending on your needs, our courses are split into three categories:

Introductory	Designed for new students to build their awareness and understanding of recovery and get comfortable with the way the College courses work. Recommended for all new students and anyone early in their recovery journey.
Intermediate	These courses have a level of complexity or sensitivity so we recommend you attend a handful of introductory courses first or you are well into your recovery journey. Courses are more focused on self management skills.
Advanced	Recommended for students who have attended a range of the self management courses as they will have a further level of complexity and sensitivity.
